

WINCO Chose ZW3D to Boost Production of Tableware & Kitchenware

Guangzhou, China: May 13, 2015—[ZW3D](#), one of the world's leading suppliers of advanced CAD/CAM solutions for the manufacturing industry, today announced that it has been selected by [DWL \(SHANGHAI\) Industries Co.](#) (WINCO), one of the fastest growing companies in its industry.

Established in 1992, DWL Industries Co. (known as WINCO), based in New Jersey, America, is a manufacturer and worldwide importer of kitchenware and tableware. In 2003, WINCO set up a wholly owned subsidiary in Shanghai, China, one of the largest producer of hardware products, to provide professional chefs and restaurateurs with quality products.

WINCO SHANGHAI produces mainly hardware appliances, like Electric Cooker, Electric Flyers, Chafers & Pizza Trays etc., and sales directly in America.

The Need

To stand out of the increasingly competitive hardware industry, WINCO SHANGHAI needed to speed up the product design and manufacturing to grab more market share. Thus, upgrading their 2D CAD platform into a 3D one is an essential approach.

The Solution

After thorough evaluation of functionalities and cost, WINCO SHANGHAI chose ZW3D CAD/CAM to simplify their workflow. They need to generate precise 2D sheet from the 3D drawings provided by headquarters, then arrange the mass production based on the modified 2D sheet.

With the powerful 2D sheet of ZW3D to support diversified international standards, like GB, ANSI & JIS etc., WINCO SHANGHAI can customize and build their own standard, detect dimensions automatically and mark serial numbers for spare parts, avoiding human errors and speed up the machining process.

Plus, ZW3D's build-in file translator helps WINCO SHANGHAI to communicate with mainstream 2D and 3D CAD file formats seamlessly, leveraging their existing DWG/DXF data and ensuring data consistency of the company's upstream and downstream.

"What distresses us every day is that we receive lots of drawings in different formats. We spent quite a long time to repair them when imported. Now, however, even large 3D CAD drawings, like UG and PROE, could be quickly opened in ZW3D with nearly error-free import, greatly improving our efficiency." Said Mr. Cheng, an engineer of WINCO.

About DWL Industries Co.

Headquartered in NJ, America, WINCO is a leading manufacturer and worldwide importer of kitchenware and tableware. From cookware to flatware, WINCO is dedicated to providing professional chefs and restaurateurs with quality products supported by superb services. With its state-of-the-art distribution center across the North America, the company has been one of the fastest growing companies in its industry.

About ZW3D CAD/CAM

ZW3D is cost-effective CAD/CAM software for 3D modeling, mold design, and machining, which takes engineers from concept to finished product in one easy-to-use, single collaborative environment.
